

Winter service

Port of Hirtshals Winter Service

Technical Service at Port of Hirtshals takes care of all snow removal and salting within the areas of the port.

Snow clearing is carried out as needed, and the roads will be cleared as far as possible before 07.00. Salting of the port's areas is carried out according to the same regulations as snow removal. This applies both on weekdays and weekends.

The roads on Port of Hirtshals' areas are cleared according to a predetermined priority. The roads on the port are thus divided into two categories – respectively class 1 and class 2:

- Class 1 includes the primary roads of the port as well as roads where there is a lot of forklift traffic.
- Class 2 includes the secondary roads which are important for the flow of other traffic.

The two classes appear on the overview map on the next page. It is the owner/tenant's own responsibility that the driveway to the individual property is cleared of snow.

In case of problems with snow removal, contact the Port Office on phone +45 98 94 14 22 or technical manager, Peter Ydesen, on phone +45 96 56 50 05.
